

Industrial Flooring Solutions for Aquatics

Our Aquatic System

Seamless, hygienic and durable

Wide range of colours available

Long service life with little-to-no maintenance

Specifically designed to meet aquatic needs:

Slip resistant (Australian Standards compliant) | UV resistant | Chemical resistant

Our Aquatic Services

Floor Preparation

Floor preparation isn't optional - it's foundational.

Inadequate floor preparation affects the quality, durability and appearance of any installation. Poor adhesion leads to lifting, bubbling or cracking.

We prepare the substrate through diamond grinding or shotblasting, removing surface contamination & creating a CSP3 profile all with HEPA-filtered vacuums and work areas with air scrubbers.

Aquatic Floor Coating

A bespoke, decorative, heavy-duty, waterproof floor topping & coating system utilising rapid cure MMA & PMMA technology. Anti-slip textured surface. Colourful & attractive. See 'Our Aquatic System' for more details.

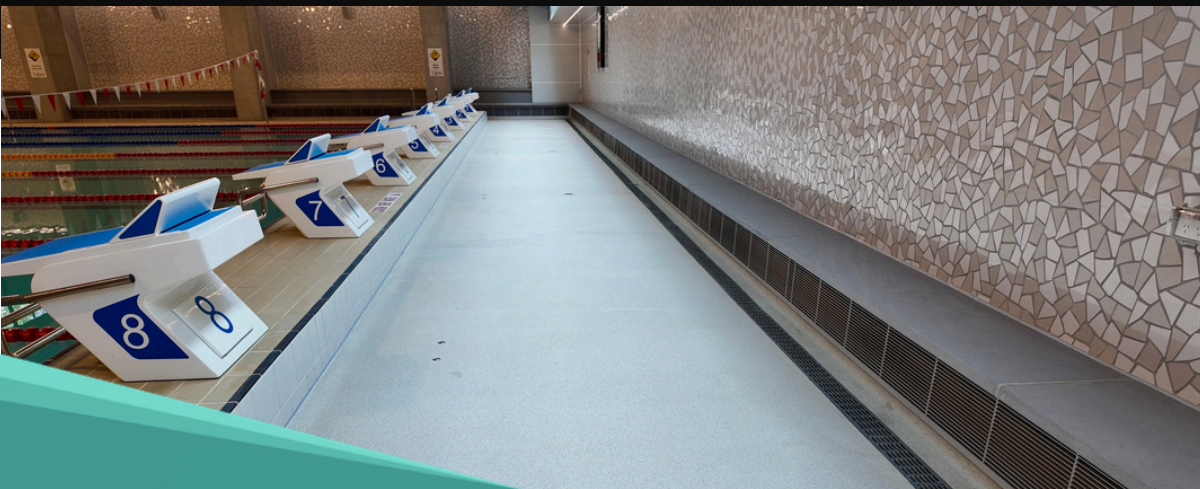

About Us

- Second-generation family operated business
- Over 40 years' experience
- Servicing NSW & ACT
- No job too big or small
