

Industrial Flooring Solutions for Aviation

Our Aviation System

Heavy-duty durability

Enhanced safety

Long service life with little-to-no maintenance

Specifically designed to meet the needs of the aviation industry:
 Abrasion & impact resistance | Chemical & fuel resistance | Reflective finish & UV stability | Seamless & easy to clean

Our Aviation Services

Floor Preparation

Inadequate floor preparation affects the quality, durability and appearance of any installation. We prepare the substrate through diamond grinding or shotblasting, removing surface contamination & creating a CSP3 profile ensuring excellent adhesion.

Aquatic Floor Coating

Protect Your Hangar. Elevate Your Operations.

When it comes to aircraft hangars, the floor is a critical asset. Our high-performance epoxy floor coatings are engineered to meet the rigorous demands of aviation environments, delivering durability, safety & aesthetics.

Whether you're housing helicopters, private jets, or commercial aircraft, we customize every system to your requirements - thickness, color, slip resistance & more.

Our Aviation Clients

About Us

- Second-generation family operated business
- Over 40 years' experience
- Servicing NSW & ACT
- No job too big or small
