

Industrial Flooring Solutions for Kitchen & Bars

Our Kitchen/Bar System

Seamless, hygienic and durable

Thermal shock resistance with odourless application

Long service life with little-to-no maintenance

Specifically designed for kitchen & bar usage:

HACCP Certified | P5 slip resistant (Australian Standards compliant) | Oil & chemical resistant | Heat resistant

Our Kitchen & Bar Services

Floor Preparation

Floor preparation isn't optional - it's foundational.

Inadequate floor preparation affects the quality, durability and appearance of any installation. We prepare the substrate through diamond grinding or shotblasting, removing surface contamination & creating a CSP3 profile ensuring excellent adhesion.

Kitchen & Bar Floor Coating

High strength & hard wearing anti-slip flooring system. Wide range of colours available.

Why choose polyurethane: Antimicrobial technology that is proven to provide effective resistance to bacteria, fungi and mould.

About Us

- Second-generation family operated business
- Over 40 years' experience
- Servicing NSW & ACT
- No job too big or small
